

Granular Activated Carbon or Potassium Permanganate Honeycomb Filters for Odor/Fume/Gas Removal

Filters contain fill percent of 50% (higher fill is available). :Constructed of corrugated kraft cell standard altitude 5/8" and surrounded by a galvanized metal frame, sealed with a dextrin adhesive. The media is held in the cells with a nylon tole grill and adhered to the cells with PVA.

Initial Air Flow Resistance: 1/2" = 0.06 in. w.g.
1" = 0.16 in. w.g.
2" = 0.28 in. w.g.

Granular Activated Carbon

- General organic odor control and removal of volatile organic compounds (VOCs).
- U/L Classified as to Flammability Only

Granular Potassium Permanganate

- Gaseous contaminant control including hydrogen sulfide, sulfur dioxide, formaldehyde, ethylene, mercaptan and alcohol;
- U/L Classified as to Flammability Only
