

# PreVent® Model R Rigid Air Intake Filter

Acts as a primary pre-filtration defense to help prevent the damage and extensive maintenance that large volumes of debris can cause. Designed for strength and durability, the air intake filter stands up to extreme outdoor or indoor exposure, corrosive chemicals, high velocity air flow, as well as industrial cleaning and maintenance.

Custom designed and manufactured to fit any sized equipment air intake. Constructed of washable three-dimensional electrostatic polypropylene media and encased in a 1/8"-3/8" rigid galvanized steel frame. Model R1 contains one layer of media and Model R2 contains two layers of media.

- Filter can be affixed to unit with patented magnetic stripping and cloth pull tab for easy access and cleanability
- Fits any equipment, specify size
- Also available in stainless steel, aluminum, or painted black metal frame
- U/L Classified as to Flammability Only
- UV protected black media standard, natural white media is also available upon request
- Standard Model R - 5 Year Warranty / Magnetic Filter Attachment - 2 Year Warranty

**MODEL #R1**  
**MODEL #R2**

Patent No. US 6,793,715

	R1	R2
Avg. Arrestance Efficiency	42%	72%
Dust Holding Capacity	67 gm.	100 gm.
Initial Air Flow Resistance	0.02" w.g.	0.05" w.g.
