

Appliance Rangehood Air Filters

Collect odors, dust and grease in your ductless range hoods, chimney hoods or extractor hoods. Filters can also be used in microwave ovens and bath fans.

Model RH is a washable filter that contains multiple layers of bonded aluminum in an aluminum frame that will capture dust and grease.

Cut-to-fit bonded aluminum is also available in a 15" X 19" X 1/4" sheet without the aluminum frame so that it can cut to the exact size needed. Sold in Display Packaged 10 Pack or Commercial Bulk 30 piece case.

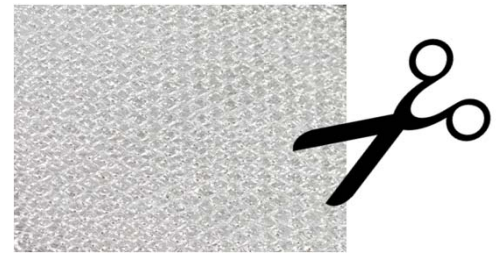

- Initial Air Flow Resistance: 0.06" w.g.
- U/L Classified as to Flammability Only
- 5 year warranty

Model RHAC is a disposable filter that contains activated carbon impregnated non-woven polyester media with a fire retardant supported by light weight aluminum mesh in an aluminum frame. Will capture dust, grease, plus adsorb odors and fumes.

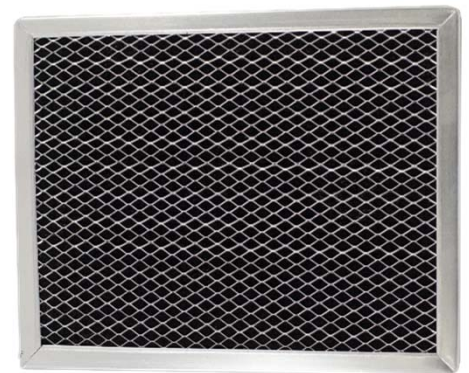

- U/L Classified as to Flammability Only
