

## Disposable Fan Shrouds

Bonnet style fan shrouds with elastic edging is available for the back side of any sized round fan guard to keep dust from being drawn in and recirculated through a facility as the fan blows. The filter opens and closes with hook closure, finished with an outer elastic edge and a center cut-out for easy installation. Fits snug around motor encasement.

Disposable nonwoven polyester media is available in white (non-tack) or blue (tack added) media. Filter attracts and holds the particles until it is easily changed out and disposed of.

- Dry type non-woven polyester
- Filter Thickness: .25"
- Initial Air Flow Resistance: .06 in" w.g.
  
- Tack type heavy duty non-woven polyester
- Filter Thickness: .50"
- Initial Air Flow Resistance: 0.11 in w.g.
- Uniform blue coating of tackifier spray bonded onto fibers for high dust holding
